Tewksbury, Mass., USA - July 28, 2014 - Raytheon Company (NYSE: RTN) signed a Letter of Intent with Poland's TELDAT to cooperate in mutually beneficial business opportunities related to Poland's air defense architecture, as well as significant exports to global markets. TELDAT is a Polish business entity, located in Bydgoszcz, which has been dynamically operating in the defense market for 17 years. It is the leading constructor and producer of the world's most innovative data communications solutions, which are dedicated mostly to security and national defense. Its products (hardware and software) and services have successfully been used and tested in the most important exercises and trainings in Europe and USA, NATO and U.S. European Command, e.g. International Interoperability Workshops "Combined Endeavor", NATO CWID and NATO CWIX and Bold Quest; research and development laboratories, e.g. NATO Communications and Information Agency in Hague and CELAR in France.

"TELDAT and Raytheon have been working together for more than two years, and we are actively pursuing business opportunities with them in electromechanical design, software engineering and overarching systems engineering," said Mike Shaughnessy, vice president of Supply Chain, Raytheon Integrated Defense Systems.

"This is yet another example of our commitment to deliver significant and sustainable benefits to Poland's defense industry, including work share, co-development, co-production and technology transfer."

"We are pleased to cooperate with Raytheon given that our companies, working in the field of advanced military technologies, have so much in common from high ethical standards to highly specialized engineering staff," said Henryk Kruszyński, Ph.D., CEO of TELDAT Company.

"Realization of joint projects creates many opportunities not only for TELDAT and Raytheon, but also for Poland. With our experience and superior products, we will provide important contributions to the next generation of Patriot."
