Raytheon is collaborating with Polish company TELDAT for C4ISR work. The two companies will seek contracts for Poland's air defense architecture, as well as global exports, according to a Raytheon announcement.

The companies will focus on: IP-based networking solutions, software and devices, militarized communications equipment, command and control software, and system integration, verification and validation testing.

"TELDAT and Raytheon have been working together for more than two years, and we are actively pursuing business opportunities with them in electromechanical design, software engineering and overarching systems engineering," said Raytheon vice president Mike Shaughnessy. "This is yet another example of our commitment to deliver significant and
